

Bibliography of Nepali Scholarship on India

Compiled by Shak Bahadur Budhathoki and Ramita Maharjan with research guidance and editorial assistance by Lokranjan Parajuli and Pratyoush Onta, all at Martin Chautari (MC)

This is the first draft of a bibliography of works done by Nepali scholars on themes related to India. We have compiled this bibliography by searching through various sources. These included relevant books, edited volumes, academic journals published from Nepal, India and elsewhere, and occasional paper series. We also did research at the Tribhuvan University Central Library (especially for dissertations completed at that university), and the libraries of the Centre for Nepal and Asian Studies (CNAS) and the Centre for Economic Development and Administration (CEDA), both at Tribhuvan University and of the Institute of Foreign Affairs (IFA), Government of Nepal and Martin Chautari. We consulted the online catalogs of the US Library of Congress (catalog.loc.gov) and World Catalog (www.worldcat.org) and did research in the online archives of JSTOR (www.jstor.org/) and Google Scholar (scholar.google.com). We also contacted several individuals and asked for lists of their relevant publications and/or details of some items when the latter information was missing.

This bibliography is incomplete in several ways. First, relevant entries in the theme covered are missing simply because we did not have access to that information. This might especially be true for MA, MPhil and PhD dissertations done by Nepali scholars on subjects related to India in universities in India, elsewhere in South Asia and beyond. Also we had access to a limited number of journals published from India and it is possible that more writings by Nepali scholars have been published in other Indian journals. Second, this bibliography mostly covers work done since the 1950s. Hence works that might have been done in earlier periods are missing. Third, our focus has been on core social science disciplines. Hence works written from disciplines in the humanities are missing. Perhaps even some other social science disciplines might be under-represented here.

Based on this draft bibliography, we can say that Nepali scholarship on India is meagre in volume. The themes that have dominated Nepali scholarship related to India include Indo-Nepal political and trade relations, trans-border migration, new dimensions and challenges of regional cooperation, and hydro-related politics.

All efforts have been made to ensure the accuracy of the entries given herein. However there might still be inadvertent errors in them. We would appreciate suggestions regarding any corrections that need to be made in the entries given here and additions of relevant items missing in this edition of the bibliography. Such suggestions should be sent to us at either library.asst@martinchautari.org.np or sinhas@mos.com.np. Relevant and correct additional information will be incorporated in future revised editions of this bibliography.

We are grateful to all those who provided us information related to this bibliography. We are also grateful to Ankala Chalaune, Kishor Pradhan, Harshaman Maharjan, Yogesh Raj and other colleagues at Martin Chautari for their assistance during the compilation and editing of this bibliography. This work was supported by a grant from the B.P. Koirala India-Nepal Foundation to Martin Chautari.
